Dear Sir/Madam,

Sub: Announcement under Regulation 51 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Disclosure of Material Events

Pursuant to Regulation 51 read with Part B of Schedule III of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby inform you of the following material events:

1. Fire Incident at TCS Data Centre

The Company had outsourced the hosting, management, maintenance and support of its Enterprise Resource Planning ("ERP") environment and associated services to ESCAPE System Consultants Private Limited. Further, the ERP servers of the Company were hosted by ESCAPE System Consultants Private Limited at the TCS Data Centre.

A fire incident occurred at the TCS Data Centre on June 5, 2026, at approximately 2:00 A.M., which impacted the hosted infrastructure supporting the Company's ERP environment.

Following the incident, the data centre service provider, made continuous efforts to restore the ERP environment and retrieve the data hosted on the affected servers. However, as per the latest communication received from them, despite all recovery efforts undertaken, the financial and inventory data maintained on the hosted servers and the corresponding backup systems could not be retrieved till now.

Accordingly, we assumed that we have lost access to our financial and inventory data from the date of our incorporation up to May 2026.

Immediately upon receipt of the above confirmation, we have initiated measures to restore normal business operations, and currently rebuilding the financial and inventory records, and is taking all necessary steps to restore our records and strengthen our data recovery and business continuity processes.

2. Technical Breakdown of 6 HI Cold Rolling Mill

Further, on June 5, 2026, at approximately 3:40 A.M., the Company's 6HI Mill experienced an unexpected breakdown. The Main Mill Motor (4200 KW) tripped, and the Human Machine Interface (HMI) displayed the fault "MILL IGBT Inverter Fault."

During further investigation, smoke and a burning smell were observed emanating from the Mill Motor. As an immediate safety measure, the breaker supply was switched off and the motor cover was removed, upon which flash damage was found inside the stator winding.

The estimated expenditure towards repair of the motor is around Rs. 55 – 65 Lakhs.

The damaged motor is covered under the Company's insurance policy. The insurer has been informed of the incident, and the insurance surveyor has initiated the assessment process.

The above unforeseen incidents have adversely impacted the Company's operations and its profitability for the current financial period.

The Company is taking all necessary measures to restore normal operations at the earliest and shall keep the Stock Exchange informed of further material events, if any, in accordance with the applicable regulatory requirements.

Kindly take the above information on record.

Thanking you.
